### RESEARCH EXPERIENCE

### • Research Collaborator

Nov 2020 - Present

Aug 2020 - Present

with Dr. Helge Rhodin, University of British Columbia.

• <u>Description:</u> As an alternative to using the checker board as a reference, I'm working on building a camera calibration system that uses gravity as a reference.

■ Member, AI Team

Sewer Cleaning Robot Project for Dhaka city,

with Center for Robotic Innovation and Development USA (CRID USA))

and Dhaka North City Corporation.

• <u>Description:</u> Working as a member of a team that is tasked with facilitating the AI component of a project to construct a robot for sewer cleaning. In order to accomplish this, sensors will be installed throughout Dhaka's drainage system. We want to create a map depicting the current condition of the drainage system based on the data collected from sensors and predict future condition using AI.

# RESEARCH PROJECTS

### **DIY Graphics Tablet** [1 paper published]

2021

A method that will allow users to get the facilities of a graphic tablet but without having a real one. Users
can simply tilt the laptop's lid to record a paper in front of it and the tool captures the users' stroke on the
paper and store them digitally on a digital canvas with perspective warp.

### **Editing Bengali Text in the Wild** [ongoing]

2021

A method that will allow editing Bengali text in natural images so that the edited image is visually the same
as the source image in terms of the background and text styles.

### **Generating Covers from the Book Summary** [ongoing]

2021

• A method where the summary of a book will be inputted and a cover will be synthesized using GAN. A dataset is currently being developed from book cataloging sites, i.e. goodreads.

### **Cartoon from Geometric Shapes** [ongoing]

2020

 A tool where the user provides simple geometric approximations, i.e. circles, quads, ellipse, etc. and a cartoon character will be created based on that.

### Jamdani Motif Generation using GAN [1 paper published] [short-listed for UNIBATOR]

2020

An AI based tool for designer where users can input the skeleton of a desired pattern in terms of rough strokes
and our system finalizes the input by generating the complete motif which follows the geometric structure of
real Jamdani ones.

### **Toon2real** [1 paper published]

2018

• Translating cartoon-styled images into their real-world scenes using GAN.

### Bangladeshi Sign Language Detection [2 papers published]

2018

 We introduce a dataset named *BdSL36* contains over four million images belonging to 36 categories and employ different state-of-the-art models to justify the possibilities of real-world application with this dataset.

### WhYMYFace: What's in Your Mind is in Your Face! [1 paper published]

2018

• An application that aims to transfer the emotions from a social media/ blog post of a user to his or her facial expression in the profile picture.
